# Quarkus - Gradle Plugin Repositories

The Quarkus Gradle plugin is published to the Gradle Plugin Portal.

To use it, add the following to your `build.gradle` file:

```
plugins {
    id 'java'
    id 'io.quarkus'
}
```

You also need to add the following at the top of your `settings.gradle` file:

```
pluginManagement {
    repositories {
        mavenCentral()
        gradlePluginPortal()
    }
    plugins {
      id 'io.quarkus' version "${quarkusPluginVersion}"
    }
}
```

**NOTE**

the `plugins{}` method in `settings.gradle` is not supported in Gradle 5.x. In this case make sure to explicitly declare the plugin version in the `build.gradle` file like the example below:

```
plugins {
    id 'java'
    id 'io.quarkus' version '1.8.0.CR1'
}
```
